Sir:

In response to the Office Action mailed November 23, 2001, please amend the above  
identified patent application as follows:

CLEAN AMENDED CLAIMS

1. (Twice Amended) An electrically resistive composite material consisting essentially of an electrically conductive material selected from the group consisting of antimony, arsenic, bismuth, cobalt, tungsten, manganese, lead, zinc, palladium, phosphorus, sulfur, carbon, tantalum, aluminum, iron, titanium, platinum, tin, nickel, silver, copper and combinations thereof, and an electrically non-conductive particulate material selected from the group consisting of silicon carbide, alumina, platinum oxide, tantalum nitride, talc, polyethylene, tetrafluoroethylene, and mixtures thereof evenly dispersed throughout the conductive material; which electrically resistive composite material is formed by codepositing the electrically non-conductive particulate material and the electrically conductive material onto a substrate by electrodeposition.
